Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Applicant's election with traverse of Group I, claims 1-11, in the reply filed on May 23, 2005 is acknowledged. The traversal is on the ground(s) that there is no undue search burden imposed on the examiner in searching the compositions and their methods. This is not found persuasive for reasons stated in the previous office action mailed April 21, 2005 which are restated here: The several inventions above are patentably distinct. The search for each of the above inventions is not co-extensive particularly with regard to the literature search. Further, a reference that would anticipate the invention of one group would not necessarily anticipate or even make obvious another group. Finally, the consideration for patentability is different in each case. Thus, it would be an undue burden to examine all of the above inventions in one application. Because these inventions are distinct for the reasons given above and the search required for each Group is not necessarily required for the other Groups, restriction for examination purposes is proper.

If applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims which depend from or otherwise include all the limitations of the allowable product claim will be considered for rejoining.

The requirement is still deemed proper and is therefore made FINAL.

Applicants have elected the species of Formula (1) wherein A = Boc, B = hydrogen, G = OH, M is absent, Q = 4,5-di-thiophenyltriazol-2-yl, and j = n = m = s = 1

Art Unit: 1654

and read on claims 1, 2, 10 and 11. The elected species is example 7 of the specification found on page 55 and compound No.6 in Claim 10. Claims 3-9, and 12-17 are withdrawn from consideration as being drawn to non-elected subject matter. The elected compound of Formula (1) wherein A = Boc, B = hydrogen, G = OH, M is absent, Q = 4,5-di-thiophenyltriazol-2-yl, and $j = n = m = s = 1$ has been found to be free of the prior art. The search was extended to compound(s) of claim 1.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1, 10 and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Tsantrizos et al US 6,608,027. The compound of scheme 6 (Example 16) is disclosed by Tsantrizos et al in Claim 49.

Allowable Subject Matter

The elected compound of Formula (1) wherein A = Boc, B = hydrogen, G = OH, M is absent, Q = 4,5-di-thiophenyltriazol-2-yl, and $j = n = m = s = 1$ has been found to be free of the prior art. Claim 2 is objected to as being dependent upon a rejected base

Art Unit: 1654

claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

No claim is allowed
